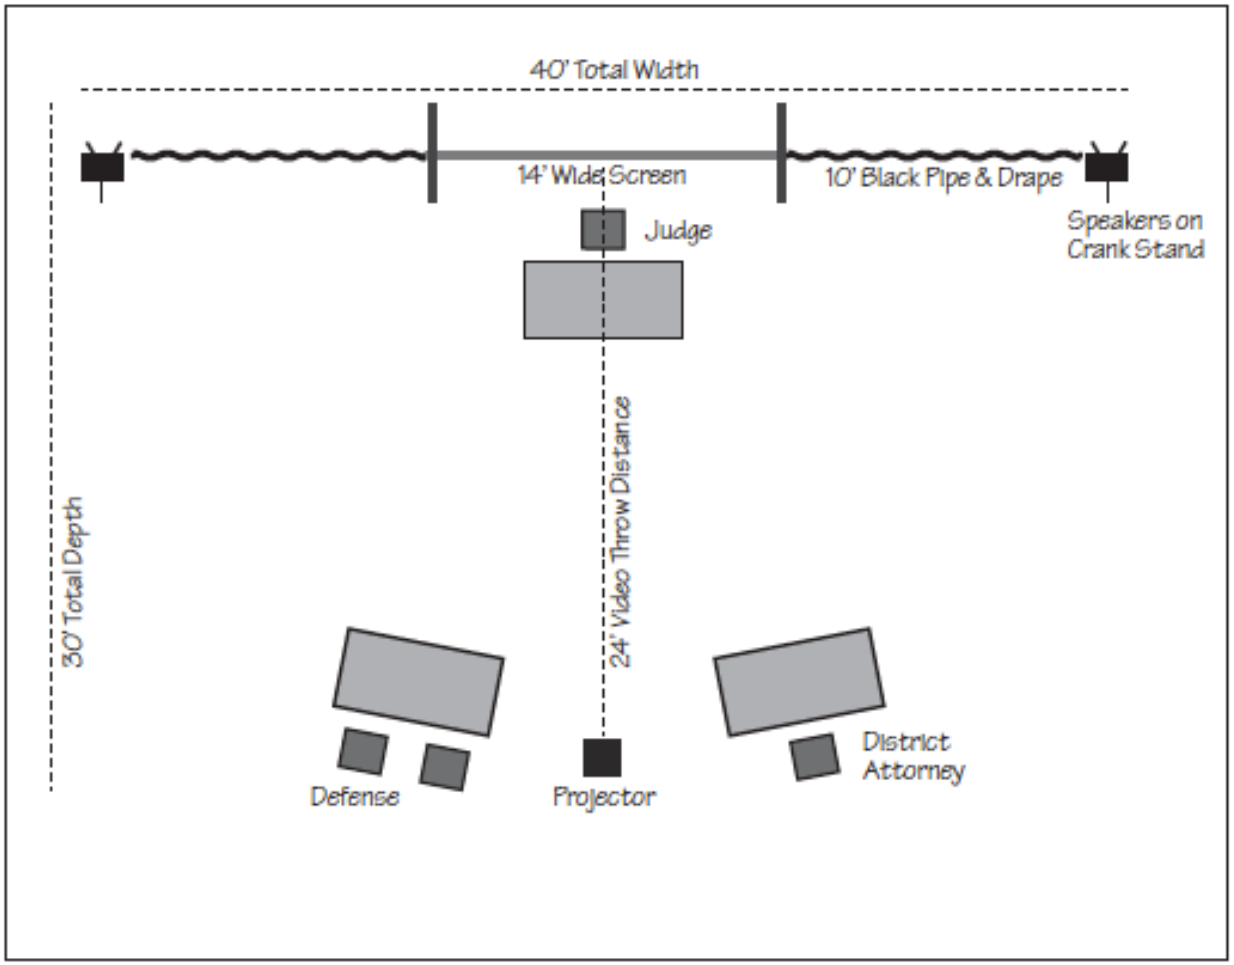
REAL DUI COURT PRESENTATION SETUP



What we need:

Access to room 2.5 hours prior to start time
Available restroom
Access to room lighting control
(2) 15a/120v. circuits
(3) 6'-8' tables
(3) Padded chairs
(1) Padded arm chair for the judge

We bring in our own wireless mics, speakers, projectors, screen and pipe and drape.

1 or 2 stage hands for setup and strike. We prefer students who are involved with theater or audio visual programs. They are welcome to remain at tech table for presentation to observe show operation, and will not be required to do anything technical.

Our 'tech table' will be placed to the side of the courtroom setup and will depend on power location, load in door, and student entrance/exit.

Our screen and pip & drape are 15' feet high. Please raise any basketball hoops or other obstructions.

On occasion, we can use the existing video projector and screen if room is equipped and we are allowed to. Smaller rooms will require smaller screen and shorter throw distance.

If space allows, we prefer to place the projector 24' behind the screen.

We bring a 9' high cargo van and love to park as close as we can to the load in door. Please have any access gates unlocked if possible.

CANAAN SOUND & LIGHT

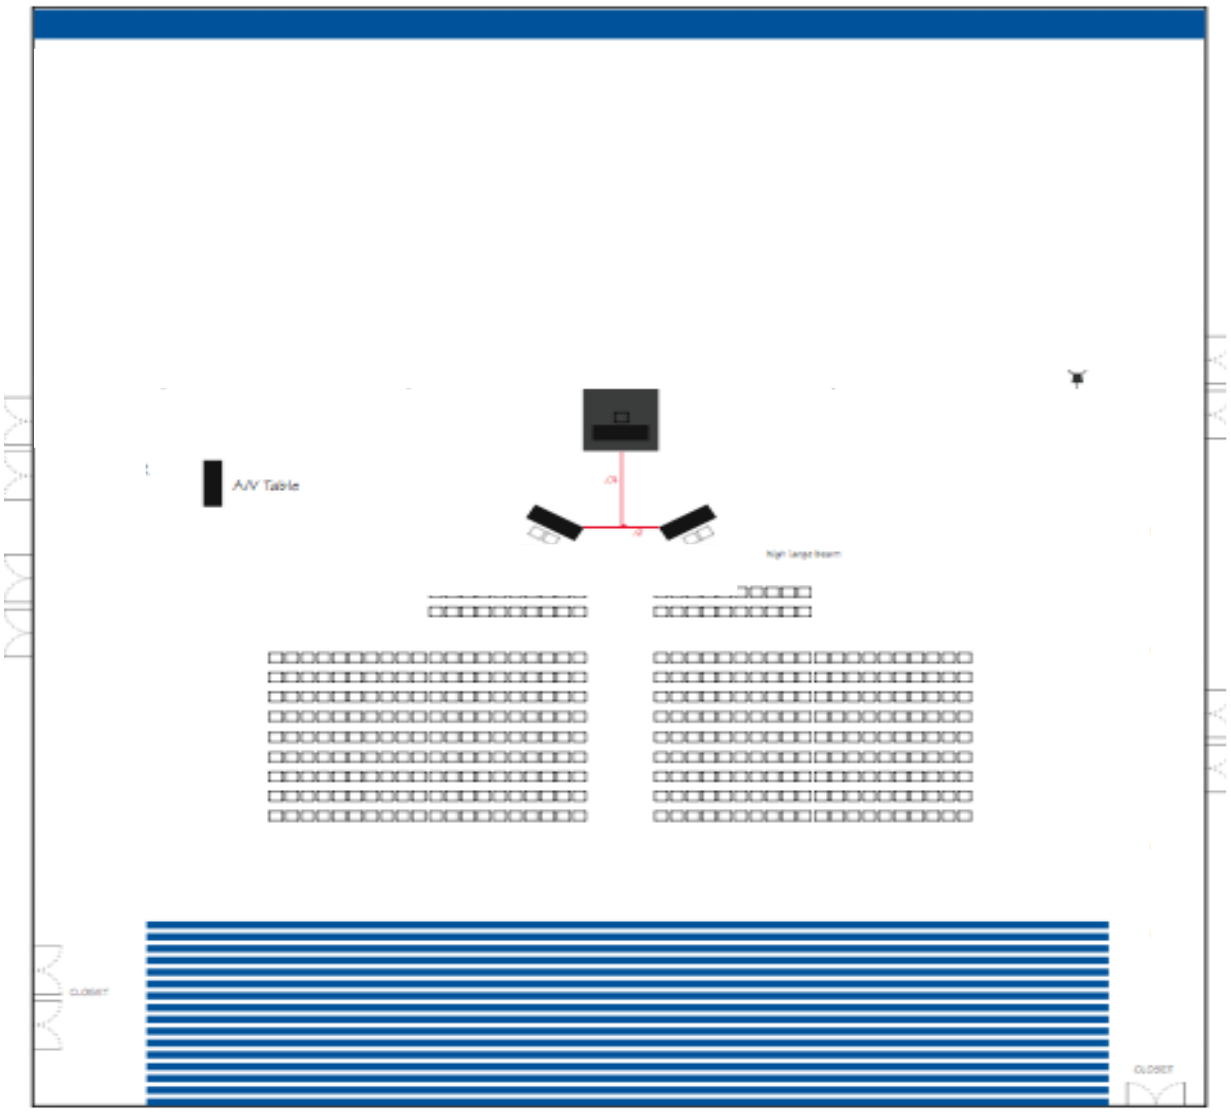
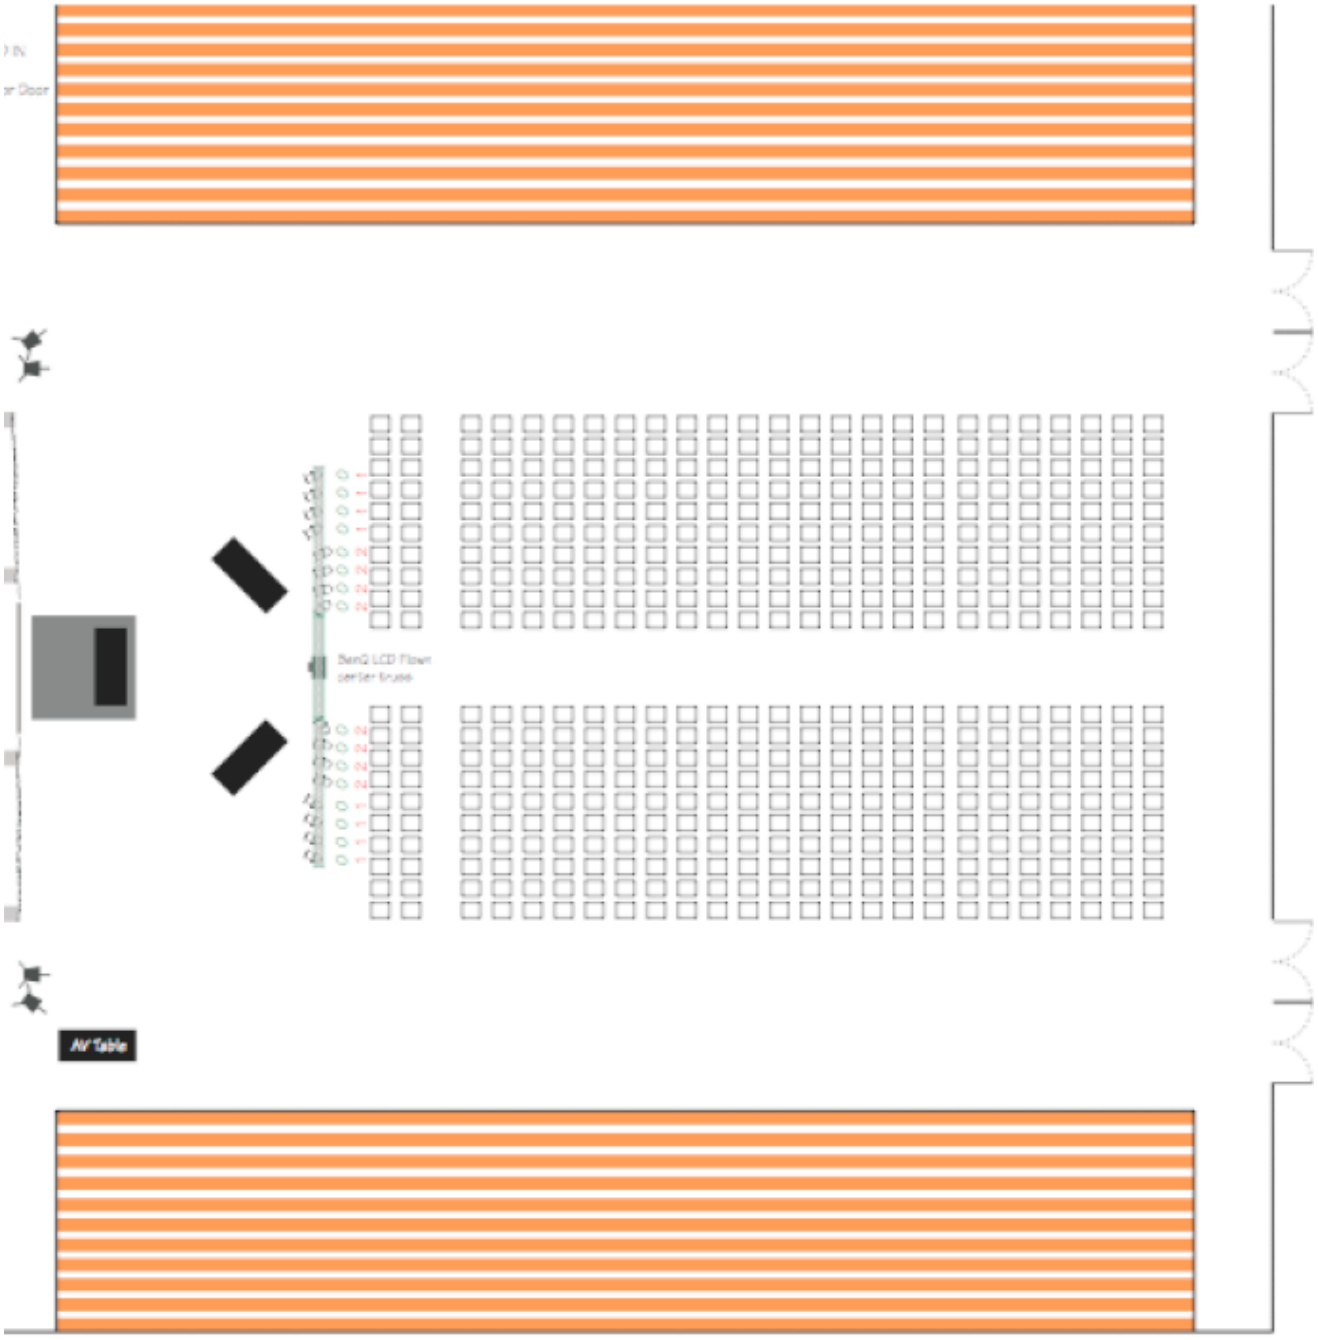
Seating Arrangement Example: Gymnasium

For improved visibility utilize only one side of the bleachers.
If additional seating is needed we ask that
you add chairs to the gymnasium floor.



Seating Arrangement Example: Gymnasium


Suggestion: For a large assembly utilize both sides of the bleachers as well as the center court with chairs.
